

Ottawa Decides To Revoke Increased Duties On Window Glass

Ottawa, Ont.—Increased duties on window glass, approved at the last session of parliament, have been revoked. This action constitutes the first definite step of this kind by the government to protect the consumer against inflated prices of commodities, the duties on which were increased. The action according to an official statement issued by Mr. George Perley, acting prime minister, follows complaints that the price of ordinary window glass is the one which has been doubled since the special session of parliament.

Equity by the government, it is stated, resulted in the conclusion that no active steps had been taken to produce glass in Canada by those having factories here. Duties on window glass now return to what they were before the special session of parliament, namely 7 1/2 per cent, under the British preference, 12 1/2 per cent, under the intermediate and the same under the general tariff. The schedule approved at the last session divided the commodity into classes and fixed specific rates which were a great deal higher than those which had been effective.

Strenuous efforts followed the introduction of the new glass schedules into the House of Commons. Premier Bennett read to the House a letter from the Canadian Libbey-Owens Sheet Glass Company, Ltd., in which that company undertakes to take immediate steps to bring their factories into operation, if the increased duties were granted. There was to be an increased price of 10 per cent on undertakings from manufacturers declared.

Prime Minister Bennett said if the prices were increased duties would come down. The government had the power to reduce the duties whenever it felt that the undertaking had not been lived up to.

Under the tariff approved at the special session of parliament specific rates on window glass became effective. They were as follows: Common and colorless glass, (A) in sheets not exceeding 120 square inches in area, per pound, British preferential tariff, 1 1/2 cents, intermediate tariff 1 1/2 cents, general tariff 1 1/2 cents. (B) In sheets exceeding 120 square inches in area, per pound, British preferential tariff, 3 cents, intermediate tariff 3 cents, general tariff 3 cents. (C) In sheets exceeding 120 square inches in area, per pound, British preferential tariff, 4 cents, intermediate tariff 4 cents, general tariff 4 cents.

Schooling Still Being Opposed By Doukhobors

Few Radicals Are Making Trouble In British Columbia

Vancouver, B.C.—While internal disorders have been reported in interior Doukhobor communities, the problem of the Doukhobors in British Columbia has been virtually solved, except for a few radicals, according to Hon. Joshua Hinchcliffe, Minister of Education.

These reports show that the community Doukhobors have adopted Canadian education so enthusiastically, since the opening of the fall term that their schools are full and in some cases must be enlarged. About 40 children of radicals are together are absent from their classes. This is a small proportion of the school population, but it is sufficient to create a problem.

It is understood the Department of Education plans action to force all these children to be educated.

A "Flying Classroom"

Chicago, A "Flying Classroom" has been built by the National Air Transport school to school its pilots in the latest developments of instrument flying. The rear cockpit is enclosed in glass and painted black or red, and is not entered. The pupil sits in this cockpit, and the instructor in the regulation cockpit in front of him. The pupil out of trouble should be get into difficulties flying "blind."

Wetland Canal Damaged

St. Catharines, Ont.—Downstream traffic through the Wetland Ship Canal had to be diverted to the old canal which was built being used for upbound traffic, as the result of extensive damage to two valves at Lock 7, at Thorold. Excessive air pressure on the valves in the main lock caused the valves to be blown out of their seats, which will cause considerable delay to traffic through the canal.

W. N. U. 1859

MORE SUPPORT FOR AVIATION IN CANADA IS URGED

Toronto, Ont.—Governments should refrain from carrying out aerial work which, rightly belongs to specialized aviation industry, according to a survey, said Gen. J. J. Macbride, president of the Aviation League of Canada, in speaking before the Canadian Chamber of Commerce here.

"Experimental, development, exploration duties and advanced training provide plenty of work for the government," he said.

Among other suggestions made by General Macbride for the advancement of commercial aviation were:

Organized training, which includes up-to-date airports, the airway system of truck and branch lines should be energetically developed. Substantial support should be given to Canadian aircraft manufacturers as it is most important the industry should be firmly established.

Small companies should be encouraged to amalgamate and branch transport lines should be entrusted to them. Commercial schools should be supported by an allowance for certificates issued.

Aeronautics education and research should be established. Any educational institution not providing facilities within its scope for its students to gain a knowledge of aviation will be considered behind the times and unprogressive.

General Macbride outlined the present regular aeroplane routes in the Dominion, and predicted that within two years the present jump from Ottawa to Winnipeg would be bridged by air mail.

Aids To Beauty Costly

Statistics Show \$250,000,000 Yearly Spent In United States

Washington, D.C.—Two thousand tons of rouge, 4,000 tons of face powder, 6,000 tons of bath salts, 25,000 tons of vanishing, 10,000 tons of other facial creams, 9,000 tons of complexion soap, 26,000 tons of skin lotions and more than 50,000 tons of cold cream assist the people of the United States in annually maintaining their beauty.

"Good looks," he said, "are bringing about a better national understanding and are having a greater effect on business than any other factor. Distance is no longer a barrier, and time and miles are being overcome by the use of fast autos and improved roads."

Mr. Rogers strongly opposed use of commercializing roads in connection with railways, although he recognized that railways secured additional business through improved highways.

Work On Bay Line Satisfactory

St. Foundation For Criticism Says Minister Of Railways

The Pas, Man.—Returning here from his first trip to Churchill, a journey made at this time partly because of charges that the report project was not proceeding as speedily as it might be, Hon. R. J. Macdonald, Minister of Railways and Canals, declared that criticism is unfair and unfounded, and that the undertaking is going ahead in an extremely efficient manner.

The minister said that it is the government's intention to open the route in September, 1931, for trade in both export and import shipments. Unforeseen circumstances may change present plans, but it is hoped that the late government's plan to open the route in a commercial way next autumn will be carried out.

He stated he was especially pleased with the excellent roadbed to the seaboard, and also paid tribute to George Kidd, superintendent at Churchill, and his staff for their efficient handling of the entire scheme. To his mind, an immense amount of work has been accomplished, reflecting great credit on the department of the interior and the C.N.R.

Authorities Must Work Together

Co-Operation Is Only Way To Solve Transportation Problems

Kelowna, B.C.—S. L. Squires, of Kelowna, chairman of the Canadian Good Roads Association, in addressing the annual convention of the Good Roads League of British Columbia, here, said that it was essential for federal, provincial and municipal authorities to work together to solve transportation problems. He also urged good roads were changing the national and even political life of Canada.

"Good roads," he said, "are bringing about a better national understanding and are having a greater effect on business than any other factor. Distance is no longer a barrier, and time and miles are being overcome by the use of fast autos and improved roads."

Mr. Squires strongly opposed use of commercializing roads in connection with railways, although he recognized that railways secured additional business through improved highways.

Preference For Canadian Goods

Canadian Chambers Of Commerce Suggest That Farmers Diversify Operations

Toronto, Ont.—If the Canadian consumer will give preference to Canadian-produced commodities, and if the farmer will diversify his operations sufficiently to produce articles for which a good Canadian market is available, then there will be a marked improvement in the ration of the grower's return.

This is the conclusion reached by the agricultural committee of the Canadian Chambers of Commerce, and placed before the convention of that body here.

Majority Of Women Voters

Women Voters Greatly Outnumber Men In England And Wales

London, England.—Women has, indeed secured the last word. The registrar-general has announced there are now 302,000 more female voters than men in England and Wales.

The city of London proper is the only metropolitan district containing more men than women voters. In South Kensington, however, the number of the men is only a few more than the women.

Curiously enough, women voters are relatively fewest in the working class areas.

Returns From North

Winnipeg, Man.—R. G. O. Johnson, reputed to be Canada's foremost north drill operator, here reached Winnipeg from working on a claim in the Athabasca district, north of Hudson Bay. He was a member of the party held up for two weeks by an exceptional gale while coming down by boat from the claim.

WILL VISIT CANADA

Japanese Minister Makes Plans To Address At Toronto

Toronto, Ont.—A visiting plan for increased trade between Japan and Canada was made by His Excellency, the Japanese Minister, Mr. T. T. Sugawara, in an address before the Canadian Chamber of Commerce here.

The Japanese minister said that if Canada thinks her rising industries need protection, it must and will be done, the minister said, after outlining the growth of trade between Canada and the Orient since 1914.

"They realize that every country has a right to regulate its own economic policy. They do not and cannot seek any modification of such policy of any foreign country. They merely desire to discover if there are any articles produced in Japan which have not come so far, but have the possibility of finding their way into Canada in future, or those which may possibly come into Canada in larger quantities than in the past."

Dr. E. Leila Burgin, M.P., one of Britain's outstanding authorities on international legal problems, who has been attending the international law conference in New York, and who is to visit Canada.

One Hundred Men Put To Work On C.N.R. Line Between Melville And Saskatoon

Saskatoon, Sask.—One hundred men have started work on the Canadian National line between Melville and Saskatoon. A stretch of 28 miles will be formed up and the 85-mile route will be completed by 100 men.

This work is part of the 140-mile program recently announced by the Canadian National Railway. The document, witnessed by two officials of the air ministry, read: "I am setting out on a fight for India and in case anything happens to me I leave all of my property and possessions to my brother, Col. Roger Gordon Thomson."

Lord Thomson ordered that he will be locked in a safe, and that it should be destroyed should he return.

Air Minister Made

Will Before Flight

Lord Thomson, Requested Everything To His Brother

London, England.—On the eve of the departure of the H-101 on the dirigible's third voyage toward India, Lord Thomson, Minister of Air, prepared a will, bequeathing all of his possessions to his brother, Col. Roger Gordon Thomson.

Mr. Maurice Dupre, Canadian second lieutenant, who represents Canada on the Sankey committee, took the document, witnessed by two officials of the air ministry, read: "I am setting out on a fight for India and in case anything happens to me I leave all of my property and possessions to my brother, Col. Roger Gordon Thomson."

Lord Thomson ordered that he will be locked in a safe, and that it should be destroyed should he return.

Mapping The Moon

Mr. Wilson, Cal.—Mapping the moon by a new type of astronomical survey has been begun by Mr. Wilson.

Observatory. An adaptation of aeroplane map making photography gives results equivalent to swinging the astronomical camera a few thousand miles into space to get more directly above the areas of the moon's face, something impossible from earth.

Plans Canada's Finest Terminal

St. Henry Thomson, Chairman and President of the Canadian National Railways, inspects the model of the \$50,000,000 terminal which his company has started to build at Montreal. The building to which the railway president is pointing is the proposed central passenger station and office building in the heart of the theatre and business district of Canada's metropolis. The plans provide for electrification of all passenger lines entering the terminal and make adequate provision for long distance and rapid transit traffic as well as development of freight facilities which Montreal will need during the coming years.

Japan Seeks Increased Trade With Canada

Japanese Minister Makes Plans To Address At Toronto

Toronto, Ont.—A visiting plan for increased trade between Japan and Canada was made by His Excellency, the Japanese Minister, Mr. T. T. Sugawara, in an address before the Canadian Chamber of Commerce here.

The Japanese minister said that if Canada thinks her rising industries need protection, it must and will be done, the minister said, after outlining the growth of trade between Canada and the Orient since 1914.

"They realize that every country has a right to regulate its own economic policy. They do not and cannot seek any modification of such policy of any foreign country. They merely desire to discover if there are any articles produced in Japan which have not come so far, but have the possibility of finding their way into Canada in future, or those which may possibly come into Canada in larger quantities than in the past."

Dr. E. Leila Burgin, M.P., one of Britain's outstanding authorities on international legal problems, who has been attending the international law conference in New York, and who is to visit Canada.

London, England.—In a room of the House of Lords, the committee headed by Lord Stanley, the Lord Chancellor, opened consideration of two questions of wide significance to the dominions.

The first is the establishment of an Empire tribunal of appeal which was mentioned in last year's report of the committee on operating of Dominion laws. The second problem is that of the nationality of subjects domiciled in the dominions.

Linked with the second is the further question of whether a marriage between a subject and an alien, is to be enabled to retain its nationality.

Official communications on the committee's progress only give the trend of the discussion in barest outline. Although it is officially mentioned that on neither point has anything approaching a definite decision yet been reached.

Mr. Maurice Dupre, Canadian second lieutenant, who represents Canada on the Sankey committee, took the document, witnessed by two officials of the air ministry, read: "I am setting out on a fight for India and in case anything happens to me I leave all of my property and possessions to my brother, Col. Roger Gordon Thomson."

Lord Thomson ordered that he will be locked in a safe, and that it should be destroyed should he return.

Mapping the Moon. Mr. Wilson, Cal.—Mapping the moon by a new type of astronomical survey has been begun by Mr. Wilson.

Starts Lone Flight

Kingsford-Smith Trying To Make Australia In Record Time

Hendon, England.—Wing Commander Charles Kingsford-Smith, Australian aviator who has flown both Pacific and Atlantic oceans, left the aerodrome here Oct. 9, in a flight plan on a lone trip to Australia. The Australian's machine just long joined with so much fuel it was estimated she will be able to fly 2,000 miles without making a stop.

The plane is a two-engine and in one cockpit a large extra gasoline supply was stored. With long hours of flight had confidence that he would be able to better the present England-to-Australia record made by Bert Hinkler of approximately 15 days.

Kingsford-Smith named his machine the "Southern Cross Junior." On previous flights he has been accompanied by one or more blimps. This time he is going it alone.

Kingsford-Smith was promoted to the rank of squadron leader for his flight this summer to North America from Ireland upon arrival he has received the Victoria Cross.

Because of his impending marriage to an Australian girl, he announced, however, that this solo flight would be his last. He sailed for Europe on July 23, to get ready for the adventure. In August he underwent two operations in Holland and announced cancellation of his flight plans, but his recovery caused renewal of the project.

United States Reducing Fuel

Makes First Move In Approaching War With London Naval Treaty

Washington, D.C.—The first big move of the United States navy to bring its fleet within the limitation of the London Naval Treaty has been announced by Admiral William Pratt, chief of naval operations.

The plan called for the withdrawal from service of 49 vessels and the immediate reduction of 4,800 men under the new arrangement.

Waterloo, Ont.—Announcement was made here from the head office of the Ontario Equitable Life and Accident Insurance Company, by S. C. Tweed, M.L.A., president, that Hon. Charles A. Dunning, former minister of finance, had been elected director and vice-president of the company. Mr. Dunning will be actively associated in the work of the company.

Ottawa, Ont.—The entrance of life insurance business has no bearing on whether or not Mr. Dunning will return to the House of Commons. The new activities he has embarked upon will have no effect on his position as a member of parliament. The former minister of finance made this clear, adding that he was glad to have this opportunity to become associated with life insurance business and to further himself with this very important phase of Canadian financial life.

Appointed To Directorate

Mr. Chas. A. Dunning Becomes Identified With Insurance

Waterloo, Ont.—Announcement was made here from the head office of the Ontario Equitable Life and Accident Insurance Company, by S. C. Tweed, M.L.A., president, that Hon. Charles A. Dunning, former minister of finance, had been elected director and vice-president of the company. Mr. Dunning will be actively associated in the work of the company.

OCTOBER 19

SIMON AND ANNA.—THE NIGHT OF THE PURPLE HEART

Golden Text: "Blessed are the pure in heart; for they shall see God." (Matthew 5:8)

Devotional Reading: Psalm 84:1-7

Explanations and Comments

Nos. Dimitris, 2:25-32. At the time of the birth of Jesus there was a great famine in the land, and the people were suffering from lack of food.

The title of the lesson is "The Night of the Purple Heart." The story is a beautiful one, and it is a story of love and sacrifice.

The story is a beautiful one, and it is a story of love and sacrifice. It is a story of a man who was willing to die for his friends.

The story is a beautiful one, and it is a story of love and sacrifice. It is a story of a man who was willing to die for his friends.

Dad just got the car out of the garage after paying a hundred dollar repair bill. He says young Jack is so good at breaking up things the automobile should give him a chance at the atom.

Chatterbox is coming early next month. This will be the first Chatterbox program to be given in Bassano for years, and the guarantee is it will be more successful financially than those preceding years.

The next thing to worry about is getting the winter coal supply. What has happened to the Bill Thompson, the Chicago kid?

The typhoid fever epidemic may not yet be past its worst. Three new names have been added to the list of typhoid patients, and the health authorities are still worried. People should take every possible precaution to protect themselves from the typhoid danger.

ABOUT THAT CHORINATION PLANT
 In another column of this issue is published an account of the negotiations between the Calgary city council and the Bassano town council concerning the installation of a chlorination plant here.

Published statements in the Calgary newspapers have led to misunderstandings regarding this matter, and the accuracy of the proceedings is published to correct these erroneous conclusions.

It was reported in the Calgary newspapers that certain members of the city of Calgary stated the Bassano town council had refused the offer of the city a couple of years ago, to install a chlorination plant here. As shown by the true account of what actually transpired, this offer was not refused, and the Bassano town council is not to blame for the loss of the chlorination plant and the protection it would afford to the water supply.

Calgary has persisted in refusing to accept the blame for contamination of the Bow River at Bassano. But her arguments are frail and vacuous, for analysis of the Bow River water here has revealed sewage contamination. That contamination is caused by the city of Calgary, and it has been going on for years in open violation of the health laws of the province.

Although denying responsibility for our water contamination, Calgary's weak and vulnerable position is revealed in her actions. At one time, several years ago, Calgary supplied chloride of lime free of charge to Bassano for treatment of the water here. Again, about two years ago, Calgary offered to give Bassano a chlorination plant. For the treatment of our water. These actions would be regarded as an admission of Calgary's guilt and responsibility, for we cannot imagine the city handing out free donations unless it is under some obligation to do so.

THE MAIN HIGHWAY ROUTE
 Should the main highway pass through Bassano? Would the expected benefits offset the cost of construction and maintenance? These are questions which the members of the town council are trying to solve.

If the town council decides to have the highway built through town, the permission of the Board of Public Utilities Commissioners must be obtained before making the expenditure of the three or four thousand dollars it will cost the town to build the road. It is doubtful if the utilities commissioners would grant permission for this expenditure.

The provincial Department of Public Works makes a practice of paying the main highways through towns and villages only when the town or village agrees to pay half the cost of construction and half the cost of maintenance. In the case of Bassano the highway would cost approximately \$5,000 or \$7,000 to build, and the town's share would be half that amount. In addition the town would be obliged to spend about \$400 a year on maintenance.

If the road is diverted around the town the provincial government will bear the entire cost of construction and maintenance. The highway will be only a short distance away, and good feeder roads will link up with the town.

Should the highway pass through Bassano the town would benefit by tourists who would stop to purchase gasoline, meals, or refreshments. If the highway is diverted around

"Metis" Dancers for Quebec

 From far-off Edmonton, outpost of Canada's wide West, to old Quebec, cradle of her civilization and gateway from Europe under both French and English regimes, a group of men and maidens of mixed French-Indian and Scotch-Indian blood will bring their tribute to the shrine of Terapiquo, when the Dances and Folk Song Festival opens at the Canadian Pacific Railway's Chateau Frontenac hotel, on October 16th, 1933.

There are twelve in the party and all proudly claim that their ancestry gives them the prime right to the title of "Canadian". The above drawing by Kathleen Shackleton, noted portraitist, made from life, shows the beauty resulting from the mingling of the European and Indian stocks. As performers, the Westerners have a varied program to offer, including toasting in moccasins.

Special Rate
 McPherson, who owned a theatre in Dundee, Scotland, visited London to get some ideas for advertising. While walking through the city he saw a notice outside a cinema to the effect that all persons over 10 years of age would be admitted free.
 "Just the thing," he told himself. The following day he returned to his native town, and the first thing he did was to put a notice outside his own theatre.
 "All persons over 10 years of age will be admitted free. It accompanied by their parents."

It's a Topsy-Turvy World
 "Times certainly have changed," sighed Smith.
 "How so?" asked Robinson.
 "Why, at a little family party last night, the women talked politics while the men got off in a corner and exchanged recipes."

Provincial School of Agriculture Claresholm Alberta

Offers Great Educational Opportunities to Boys and Girls

TERM OPENS OCTOBER 28th, 1930

BOYS Courses in Agriculture, Husbandry, Field Husbandry, Farm Machinery, Tractors, Carpentry, Blacksmithing, English, Mathematics, etc.

GIRLS Course in Home Economics, Lectures and practical work in Cooking, Sewing, Home Nursing, and other household subjects; Dairying, Poultry, Gardening, English, Mathematics, etc.

No tuition fees. Every boy and girl 16 years of age may attend. Residence for girls. School calendar mailed on request.

H. A. CRAIG Superintendent of Schools S. H. GANDIER Principal

Most dairy products are increasing in popularity on the dairy farms of the people of Canada. The per capita consumption of meat is eight per cent, greater than in 1920 and the total quantity of meat consumed annually in the Dominion has increased 20 per cent in the last 10 years.

Ontario tops the list of Canadian provinces with fatalities at level crossings during the past three years, according to Arthur Gabor, secretary-general of the Province of Quebec Safety League. His figures show 71 deaths in 1925, 73 in 1926 and 76 in the first six months of 1927. These figures compare with 39, 47 and 51 for Quebec in the same periods. The greatly reduced numbers in the case of Quebec are attributable, says Mr. Gabor, to the observance of the law in that province calling upon car drivers when reaching a crossing whether a train is in sight or not.

Eight Atlantic silver sea-run salmon are entering New Brunswick anglers' waters in greater numbers than ever this year, according to reports from wardens reaching the provincial department of Lands and Mines. On the Restigouche River catches of 24 lb. and 25-lb. salmon have been made.

PROVINCE OF ALBERTA
Department of Agriculture

Threshers Returns

For the purpose of statistics, only, it is necessary that the owners or operators of threshing machines furnish reports of total threshing, to the above Department at the earliest possible date. Your co-operation will be appreciated.

H. A. CRAIG
Deputy Minister of Agriculture

FOR SALE—Pure bred White Wyandotte cockerets at \$2.50 each.
Mrs. E. R. Held, Coonville.

14-15-16

GOOD WINTER KEEP for stock; abundance of water. Apply at the Bassano Mail office.

15-17-18

WANTED—School girls for board and room; reasonable rates.
Mrs. Rens, Hussar, Alta.

14-15-16

FOR SALE—Fawn and white Hunter Dicks and Drakes, fully developed, \$1.50 each.
See, Bowdoin, Alta.

15-17-18

FOR SALE—Two stacks rye hay, 10 to 15 tons in each; who put up nice and green in the filling stage. Apply at post office, Latham, Alta.

15-17-18

Local News

Dr. A. G. Scott, H. Steiner, Dr. B. H. Barlow, and H. T. Johnson went to Medicine Hat last Tuesday to attend a district meeting of the A. P. & A. M. C.

Young Richard Bond, son of A. G. Bond, has typhoid fever. He was taken to the hospital last Saturday.

Two other cases, recently added to the list of typhoid patients, are those of Mrs. T. N. Simpson and Mrs. Hinds Jr.

H. D. Brown, W. G. Nelson, F. R. Reeves, and E. J. Bell were in Bassano last Sunday to attend the Masonic service in Knox Presbyterian Church.

L. V. Birnie, proprietor of the Imperial Hotel, has built a private office in the northwest corner of the hotel rotunda where there was formerly an entrance.

Mrs. J. L. Torgan, of Winnipeg, recently passed through Bassano on her way to Calgary to visit friends and relatives.

The Girl Guides will hold their regular meeting in the Oddfellows' Hall next Monday evening. Friends welcome.

Rev. P. C. McCarra preached a splendid Masonic sermon in Knox Presbyterian Church last Sunday evening. About thirty-five Masons attended.

Ralph Barons, farmer and rancher from near Wardlaw, north of the Red Tree River, was in town this week. He says the crop in his district was very light this year, but there is now a good supply of moisture in the ground and there are hopes for a good crop next year.

All those interested in curing are invited to attend the meeting of the curing club next Tuesday evening at 8:00 o'clock in the office of A. G. Bond.

The Women's Missionary Society of Knox Presbyterian Church will hold a tea and sale of home-made candy in Currie & Milroy's store on Thursday, October 23, from 2:00 to 5:00 p.m.

Wife to husband, dining at fashionable restaurant. "You won't read that book of etiquette, and now look at you! Here's the dessert, and all you've got left is the butter spread."

A cowpuncher ordered a steak at a restaurant. The waiter brought it in rare—very rare. The cowpuncher looked at it and demanded that it be returned to the kitchen and cooked.

"Water," he cried. "I've seen such a cowpuncher as that and get better."

Husband: "What you please listen to me?"
Wife: "Only when you talk in your sleep."

Waterproof clothing prices in Vancouver have been advanced, but the fiber goods market there continues quiet. The British Columbia market for silks on hand are fairly low. August production of pig iron and steel in Canadian plants was substantially under July output and was only about half of the total for that month of that year. A slight gain, however, is noted in the output of ferro-alloys.

Costly Investment
"Dear John," the wife wrote from a fashionable resort, "I enclose the hotel bill."

"Dear Mary," he responded, "I enclose check to cover the bill, but please do not buy any more hotels at this figure—they are cheating you."

K Woman's Custody
He had been to a man dinner, and his wife wanted to hear all about it when he got home.
"Well," he said, "one rather odd thing occurred. Jim Blanton got up and left the table because some fellow told a story he didn't approve of."
"How noble of Mr. Blanton!" exclaimed the wife, "and—what was the story, John?"

The Humble Cow

is a great little asset to have on the farm. The cream she gives is valuable. We would like to handle your cream.

Imperial Conference Delegates Sail

The Canadian Pacific liner Empress of Australia might almost have served as a Cabinet Council room during its last voyage to England with the Prime Minister of Canada and several members of his cabinet as passengers. Three was so great a crowd at the pier in Quebec that photographers had to go to Father Point to get pictures of the party.

Above are several groups made while the ship was on her way. The Premier and his sister Miss Mildred Bennett shake hands with Captain R. G. Latta, commander of the Empress of Australia.

Mr. Fergusson, Mr. Fergusson said that while he was not attending the Imperial Conference he "hoped to listen at the telephone." He will open the Ontario Building in London during his visit. Mr. Hon. H. H. Stevens, Minister of Trade and Commerce, who is an official delegate, Mr. Hon. Hugh Guthrie, Minister of Justice, also a delegate.

They were large in size, of good cracking and extraction quality, grown

by Harold English, near Chatham, was made at the Nut Growers conference held at Cedar Rapids, Iowa.

Mother (in train): "Tommy, if you don't stop begging for candy I'll slap you."

Tommy: "You slap me and I'll tell the conductor my real age."

It is hardly necessary to emphasize the millions of dollars which have been invested throughout Alberta in this industry.

Hundreds of Albertans enjoy steady employment throughout the year in the brewing, storing, transporting, of the products of the five great modern breweries of Alberta.

Alberta Brewery Products are served by the bottle or glass at hotels. Sold by the barrel or case from our warehouses.

Where beer by the glass is available, most men are satisfied to forego the full bottle of more potent liquor.

ONE GOOD RECIPE MAKES A COOK FAMOUS

At this time of the year when the days are short and the air is crisp, is the sunny afternoon, a cup of tea and a sandwich makes a pleasant hour in the day. For evening parties, too, coffee and sandwiches are always an easy and tempting refreshment to serve. New fillings for sandwiches are always attractive to the hostess and the following recipe will be found appealing.

Cut thin slices of bread and butter and spread with the following sandwich filling: Mix well, tablespoon of flour, 1 egg, half teaspoon of mustard, half teaspoon of salt, one quarter teaspoon of pepper, 1 teaspoon of sugar. Add one cup of boiling milk with 1 tablespoon of butter and boil for three minutes. Take off the stove and beat in half cup of vinegar slowly. Then add 3 chopped pimientos, 1 cup cheese, 2 hard boiled eggs, and 2 chopped olives. The mixture is ready for use when cool.

Trend of Business
Is More Promising
Throughout Dominion

OTAWA, Oct. 15.—It is believed by the trend of business, that the low point of the economic depression in Canada has passed. Sales of winter clothes have improved since summer, although manufacturing is still at a low ebb. The maritimes and Quebec provinces are harvesting satisfactory crops. Ontario anticipates a light corn crop but a fair tobacco crop.

Eastern shoe and leather manufacturers are experiencing a much better demand and are consequently producing more shoes.

The textile industry is unsettled, but optimistic forecasting increased production with less competition from foreign goods. Each line, one of the largest of the Quebec mills is reported to be bringing additional looms into operation to increase its output from 45 to 50 per cent capacity. Ontario inventories in textile lines are low and some dealers predict an actual shortage, although full orders are coming in.

The August production of Canadian plants, 9,792 units, is the lowest of the year to date, being 4 per cent under July and 31 per cent under August 1929 production. Eastern demand for electrical apparatus has improved somewhat and hardware distributors in that section are satisfied with the general outlook, although sales are below last year's level. A slight pickup is noted in winter specialties, including outdoor sporting goods, which are moving fairly well. Substantial increases are noted in Ontario prices for window glass. Seasonal quiet rules the agricultural implement market, where demand is light; its coachery market has not improved.

Waterproof clothing prices in Vancouver have been advanced, but the fiber goods market there continues quiet. The British Columbia market for silks on hand are fairly low. August production of pig iron and steel in Canadian plants was substantially under July output and was only about half of the total for that month of that year. A slight gain, however, is noted in the output of ferro-alloys.

Machinery Ousts 50,000 Workers-On Power Undertaking

OTTAWA, Oct. 15.—Striking evidence of the manner in which machinery replaces man power was presented early this month when direct-acting representatives of 50 Canadian daily and 500 Canadian weekly newspapers over the huge St. Lawrence power development now in progress between Lake St. Louis and Lake St. Francis, Quebec.

Machinery there is replacing more than 50,000 men on a two-and-a-half year job. A staff of 2,300 men, plus mechanical equipment, is doing a work that would require, without the machinery, between 50,000 and 60,000 men to complete it in the same period of time.

The ultimate development may reach 2 million horse power, while the new under way will provide five hundred thousand horse power of energy. For a distance of fifteen miles through a canal 3,000 yards wide a new route is being cut across country for the St. Lawrence. In it will be a passage 600 yards wide, the first big link in the deep water navigation development of the St. Lawrence between the lakes and Montreal.

To carry on the work the corporation has laid and operates 30 miles of railway, power transmission lines for equipment, telephone lines to maintain contact with headquarters, is re-orienting rivers and railway lines and highways; in fact, is engaged upon a project so immense that a few years ago it would have been possible only for a government to contemplate it.

The chief feature of the undertaking is the manner in which the manual labor has been curtailed. A single electric hydraulic dredge is cutting thirteen and a half miles of the new canal basin, sucking out the material and depositing it up to a mile distant at a rate that would require a whole army of men, if man-power were employed.

Great tower and drag-line excavators move more earth and rock every two minutes than a dozen men could move in a full ten hour day.

What machinery is really doing is made clear by the fact that 50,000 men employed at only \$50 per month for thirty months would cost \$750,000 in wages, while the total cost of the Beaudouin development now under way will be \$65,000,000, and this figure includes the 25,000 acres of land purchased for the project, and all the materials which enter into it. Machinery is reducing the direct labor cost from \$120,000,000 to probably \$10,000,000, and thereby making possible the sale of power at a price that will create industry and thereby give permanent work to more than are now deprived of temporary employment through the mechanization of construction work.

See Market For
Canadian Wheat
In United States

MONTREAL, Oct. 15.—Within five years the United States will be buying Canadian wheat in large quantities according to E. W. Beatty, K.C., president of the Canadian Pacific Railway Co., who has just returned from a tour of the western provinces. Mr. Beatty states that he found conditions in the west "much as he had anticipated" and says that he was delighted with conditions in general there. "Canada cannot go back," he said, and in his opinion the Dominion will steadily forge ahead in the face of the depression.

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 90 out of every 100 men who are putting on weight, I didn't have the energy to go to work. I lost all interest in my healthy activities and just laid around. I got fat, fat, fat, until I got this Kruschen feeling."

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood; they keep the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of phoning yourself in an easy chair every morning and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and enabled to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of water to-morrow morning and every morning on a glass of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

WORLD HAPPENINGS BRIEFLY TOLD

Alex. Chisholm, prospector and veteran of the "Trail of '98," is dead at Saulters, B.C., at the age of 70.

Swissers (telegraph service has been established between Russia, Alaska and Chilean cities and with Spain.

The 110,000,000 Canadian government bond issue floated in the New York market October 7, was heavily over-subscribed.

Assembly of the League of Nations stood in silence several minutes on the occasion of the twenty-fifth anniversary of the death of Count Strassmann, German post-war foreign minister.

The eleventh assembly of the League of Nations adjourned Oct. 4, after wrestling earnestly for three and a half weeks with pressing world problems.

Reports published abroad that trouble had arisen aboard the British battle cruiser "Havens," anchored in Gullf Juan harbor, Nicaragua, were denied by authoritative sources.

A number of delegates attending the Canadian Automobile Association convention at Vancouver endorsed the proposed highway through British Columbia to Alaska, in addresses made at the annual meeting.

The London Times editorially said that Russian dumping of grain on European markets was "clearly due first and foremost to desperate need of the Soviet Government for credits to finance their five-year industrialization plan."

The Department of National Defence announces that Major D. H. Sargent has been promoted to the rank of lieutenant-colonel and to command the 2nd Battalion, the Scottish Regiment. The regimental headquarters are at Nanaimo, B.C.

Had Never Seen Ocean
To have lived within 20 miles of the Atlantic Ocean for a lifetime without seeing it is an experience that comes to few in these days of automobiles. Yet fifteen of the seven-teen Vermont clergymen who attended the New England rural church workers' conference near Old Orchard, Me., had never seen the sea.

And probably the champion of all endurance champions is mother.

Large steel manufacturers in Canada are operating near at capacity.

Germany planted 1,800,000,000 trees in 1928.

Flaky Pie Crust

The secret of making good pie crust is "Use Purify Flour—and keep the dough dry." Try this recipe—for 2 shells:

1 cup Purify Flour 1 cup lard
1/2 teaspoon salt 1/2 cup cold water
MIXTURE: Mix the flour and salt, cutting in the lard with the fingers, until the mixture is granular. Add the cold water bit by bit, stirring with a fork, until the mixture is a stiff dough. Roll out on a hard well-floured surface with Purify Flour. Roll out about 1/8 inch thick. Spread between sheets of paper and roll out to the desired size and shape. Bake in a hot oven (400°).

Sandwich Purify Flour
Cook Book.

New Source Of Power

French Scientist Generates Energy In Amazing Way

Thermal differences between surface water and colder water from the depths of the Gulf of Mexico have been utilized by Professor George Claude, French scientist, to generate new energy.

A small turbine installed by the scientist on Malakoff Bay revolved at 4,000 revolutions per minute, deriving its power from steam generated by submitting warm surface water to a vacuum.

The steam utilized to turn the turbine was reduced again by condensation to water, the process being used to maintain a vacuum necessary to generate the steam. Cold water from the depths of the Gulf of Mexico was used for the condensation.

Commemorates First Submarine Cable

Tablet Marking Historic Event In Canada Is Unveiled

A tablet commemorating the laying of the first submarine cable in North America was unveiled at North Sydney, Nova Scotia, by Judge Walter Crowe, on behalf of the historic site and monument board of Canada. The inscription on the bronze tablet, placed on the front of the present cable building reads:

"First Atlantic cable. This tablet commemorates the first submarine cable in North America, laid in 1858 between Cape Breton and Newfoundland, the first stage in the development of cable communication between this continent and Europe."

"First Atlantic cable. This tablet commemorates the first submarine cable in North America, laid in 1858 between Cape Breton and Newfoundland, the first stage in the development of cable communication between this continent and Europe."

So Described By Former British Ambassador To States

Lord Howard, former British ambassador to the United States, speaking before the Atlantic branch of the English-Speaking Union, described the United States as a new empire, "actually far more powerful than any that has ever before existed."

Lord Howard said that he still found many people in Great Britain who persisted in considering the United States as if it were just another great power like France, Germany or Russia before the war.

It would be well if such persons would try to grasp one central fact of the present century," he said. "The new empire which dominates the world, actually far more powerful than any that has ever before existed, and that the British Empire has an underdeveloped frontier of 3,000 miles with this vast continental power."

He asserted that a realization of the facts and figures concerning each country by the other and an understanding of what each would lose by war between them was a more solid guarantee of peace than sentiment.

Gift From Canada

Mounted Buffalo Head Sent To British Medical Association

En route to London, England, where it will adorn the walls of the British Medical Association headquarters in Tavistock Square, a mounted buffalo head, a gift of the people of Canada, The Winnipeg Canadian National Express for Montreal.

The head was presented to the British Medical Association by Premier Bennett during their recent convention in Winnipeg, and was received on behalf of the association by Dr. H. A. H. Bennett, president of the British Medical Association.

Taken from the buffalo herd in Watnigwip Park, Alberta, the head is one of the finest specimens according to a Winnipeg taxidermist who packed the head for shipment.

Daily Air Service
A daily air service between Lethbridge, Calgary and Edmonton, Alberta, has recently been inaugurated. This new service connects with the air mail service from Calgary to Winnipeg.

Java's sugar crop this year weighed nearly 3,300,000 tons.

Java gets more thunderstorms than any other country.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and stomach? Many believe they have heart trouble and are taking medicine for nothing. May be they have indigestion. Take Carter's Little Liver Pills after meals and neutralize the gases, soothe the sour and acid stomach, relieve the gas, encourage digestion. The liver and stomach will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c box of Carter's Little Liver Pills.

Having Rough Trip

Trans-Canada Motorist Not Discouraged Over Hard Going

Touring the country in a motor car might be all right as a pastime—that is, if the roads are in condition, but where there are no roads at all it's not so good.

Sitting in a dizzling rain before the glare of his car's headlights, his hands stiffened by the chilled blast of Northern Ontario, F. H. Needham, trail blazing motorist, attempted to convey to the folk back home his experience as the first motorist to attempt a trans-Atlantic trip without crossing the border or driving along the railway right-of-way.

In a message which found its way to Toronto, Needham described his forced delay in the wilderness made necessary by the fact that his car had been wrecked in the Northern Ontario. His car was wrecked in the snowing, soaked by constant rain, his car completely submerged, but still he hopes to reach his goal at the Pacific Coast. But it's not the first time the car has been stuck. Time after time, with the aid of cables and an attachment to the rear wheels, Needham and his companion have pulled the car from the boggy muck, and time after time they've been forced to build bridges and temporary runways for the car.

All part of a trans-Canada motor trip.

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division), elected Walter Ashfield, Editor of the Grenville Sun, as president for the ensuing year.

H. G. Sheldrake of North Battleford, the retiring president, was chosen as honorary president. A. King, Rouleau, vice-president; S. J. Doran, Alameda, secretary-treasurer; while the following were elected to the executive: S. M. Wynn, Yorkton; E. P. Hodgins, Vanguard; J. J. Zubick, Kerrobert; J. Scott, Whitewood.

Several instructive addresses were given during the sessions. Mr. T. A. Brown, of the Department of Publications, gave an interesting talk, and Hon. J. F. Bryant spoke on the subject of Saskatchewan's Resources. The members of the association were the guests of the Saskatchewan Government at a banquet on Thursday evening, Oct. 2.

Polishing the banquet, an informal dance, sponsored by the Toronto Type Foundry Co., was greatly enjoyed. At noon on Friday, Oct. 5, the members were tendered a luncheon by the Saskatchewan Wheat Pool, and on Friday evening the weekly newspaper association held a social.

The meeting was closed by the newly-elected president presiding. It was decided to hold the 1931 convention at Regina.

Good Recipes

Smoothness Of Texture In Recipes That Call For Milk And Sugar

Do you ever have difficulty in getting a smoothness of texture in recipes that call for milk and sugar? Good recipes obtain wonderful flavor and consistency through the use of Eagle Brand Sweetened Condensed Milk. The milk and sugar are thoroughly combined (almost ice-cream) you might say, so that results are obtained that could not be obtained if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from the smoothness of the mixture, there is the certainty of a finer flavor to the dish. The condensed milk thickens quickly and easily with all other ingredients—binds them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Saskatchewan Wheat Pool

Nomination papers for the annual election of Saskatchewan Wheat Pool agents and officers were mailed out from the Head Office at Regina, Nominations will be accepted up to 6 p.m. on Tuesday, November 4. As soon as possible after the closing of nominations, ballots will be mailed out to all Wheat Pool contract-signers in the sub-districts where two or more candidates have been nominated. The closing date of the election has been set for Tuesday, December 2.

Marvelous Yield Of Oats
Alert to the possibilities of "Massive" oats, William White, farmer of the Alert district, southeast of Biggar, Sask., has reaped a marvelous yield. From an experimental plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture and the neighbors threshed the grain, measured the plot and verified the yield.

Canada has lost in eleven years, through insect pests, almost as much as the spent on war demobilization from 1915 to 1926.

IS ELECTED PRESIDENT

Walter Ashfield, Editor of the Grenville Sun

Weekly Newspaper Publishers Meet

Fourteenth Annual Convention of Canadian Weekly Newspaper Association, Saskatchewan Division

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division), elected Walter Ashfield, Editor of the Grenville Sun, as president for the ensuing year.

H. G. Sheldrake of North Battleford, the retiring president, was chosen as honorary president. A. King, Rouleau, vice-president; S. J. Doran, Alameda, secretary-treasurer; while the following were elected to the executive: S. M. Wynn, Yorkton; E. P. Hodgins, Vanguard; J. J. Zubick, Kerrobert; J. Scott, Whitewood.

The milk and sugar are thoroughly combined (almost ice-cream) you might say, so that results are obtained that could not be obtained if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from the smoothness of the mixture, there is the certainty of a finer flavor to the dish. The condensed milk thickens quickly and easily with all other ingredients—binds them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

Saskatchewan Wheat Pool

Nomination papers for the annual election of Saskatchewan Wheat Pool agents and officers were mailed out from the Head Office at Regina, Nominations will be accepted up to 6 p.m. on Tuesday, November 4. As soon as possible after the closing of nominations, ballots will be mailed out to all Wheat Pool contract-signers in the sub-districts where two or more candidates have been nominated. The closing date of the election has been set for Tuesday, December 2.

Marvelous Yield Of Oats

Alert to the possibilities of "Massive" oats, William White, farmer of the Alert district, southeast of Biggar, Sask., has reaped a marvelous yield. From an experimental plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture and the neighbors threshed the grain, measured the plot and verified the yield.

Canada has lost in eleven years, through insect pests, almost as much as the spent on war demobilization from 1915 to 1926.

Baby's Colds

Checked without Dosing
Applied externally, Vicks VapoRub relieves without upsetting the delicate system.

A Huge Undertaking

Building of Sydney Bridge in Australia Requires Much Steel

The central arch of Sydney Bridge in Australia has been closed and it is expected that 18 months will elapse before the bridge is open for traffic. Construction by the British firm of Dorman, Long & Co. is the largest arch bridge in the world. The contract price was \$4,217,721, but the total cost will probably exceed \$6,000,000. There was provision throwing on the New South Wales Government the cost due to rise in wages, which have been large.

In planning the bridge it had to be considered that more than half the total traffic of Sydney, the chief port in Australia, had to pass under it. The bridge had to give headroom and clearance to big ocean liners. The central arch is a single span of 1,650 feet, and there is a clear headroom of 170 feet at low water. The top of the arch is 440 feet above the water, exactly the same height at the highest point on Hampstead Heath in London, 175 feet higher than St. Paul's Cathedral. With its approach, the bridge is 3,770 feet long. The total width of the deck of the bridge is 160 feet. It carries four lines of electric railway, in addition to a 57-foot roadway and two footways. There are 37,800 tons of steel in the arch construction and 13,000 tons in the approaches, a total of 50,800 tons.

Catering To Visitors

Wanderers, England, Baa Sunday
Civic Sports Plan To Cross Atlantic

To boost its scenery and also give city employees a holiday, Wanderers, England, has decided that municipal tennis courts, putting greens and golf courses be closed on Sunday. Those in favor of sports on Sunday afterwards said that records showed that the clergymen and residents of Wanderers would be in the city on Sunday, but the city council decided that visitors should go to Wanderers for scenery and solitude.

Immigration Returns

During the first four months of the current fiscal year, 58,273 immigrants were admitted to Canada as compared with 94,214 for the similar period of 1928. Those from the British Isles numbered 19,317 and from the United States, 12,075, while 11,109 came from Northern Europe.

Cowper says "Nature is but a name for an effect whose cause is God."

Plenty Of Wheat

George Kabel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 40 years to make 118,200,000 loaves of bread. His average has been 30,000 bushels a year.

Prayer Was Answered

Farmer Jim Garrett, of Coolidge, Kansas, spent most of the summer praying for rain—then it rained hard he had to use a rowboat to harvest his Kaffir corn.

Left Problem Unsolved

Britain's Foremost Physicians Can't Tell What Causes Hay Fever

"Ditok whiskey," "Don't drink whiskey," "Smoke strong cigars," "Don't smoke at all," "Get the good heartly man a day," "Restrict your diet to very light meals," "Get plenty of exercise," "Lie around and take things easy," "Put all your meals in the dining saloon," "Take your meals on the deck if you feel squaggy," and a dozen other remedies for sea-sickness were discussed by 100 of Great Britain's foremost physicians and surgeons before they sailed for home on the Canadian Pacific liner, "Duchess of Richmond."

The diversity of opinions was so great that before the 28,000-ton liner sailed the medical party had divided itself into two schools of thought. One prominent Irish surgeon told interviewers that a similar discussion had taken place when they departed from England. "If that ship had been on the agenda at the British Medical Association meeting in Winnipeg, the discussion would still be going on," he said, "and not one of us could have offered a constructive suggestion."

"Sea-sickness is a mental condition," the English surgeon, with whom the street physician agreed, "if you make up your mind that you are not going to be sick you won't be." Which sentiment might have been had by a colleague clipped in the next remark: "Then you must have made up your mind to be sick on the way down," he said, "and not one of us could have offered a constructive suggestion."

By the time the last whistle blew five minutes before the "Duchess of Richmond" cast off her hawse, one conclusion was reached and the 100 doctors agreed as one man that their course would be if overtaken by the maelstrom.

Collectively they agreed that the proper practice would be to call in the ship's doctor. "He knows more about it than we do."

An Unusual Voyage

Two Germans Plan To Cross Atlantic In Rubber Ball

To bounce across the Atlantic in a rubber ball is the unique project of two Germans in New York. They have written nine rubber companies giving them the opportunity of making a ball. They calculate with the help of the ocean and wind currents to make the unusual voyage to Europe in sixty days, but to be on the safe side they intend to take provisions and water for ninety days.

Plenty Of Wheat

George Kabel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 40 years to make 118,200,000 loaves of bread. His average has been 30,000 bushels a year.

Prayer Was Answered

Planning Home For Veteran Mothers

Campaign Started To Raise Funds For Building In Calgary

The building of a memorial institute in Calgary where needy veterans of the Royal North West Mounted Police may be taken care of, will be undertaken within the next few months if the aims of a recently organized campaign are realized, it was learned here at Calgary.

The campaign, which will be carried on under the direction of Capt. W. C. Proby and other officials of the R.N.W.M.P. Veterans' Association, has as its object the raising of a fund of approximately \$100,000 to provide for the erection of a suitable home for veteran men of the force where declining years may be spent in comfort and security.

The sum of \$5,000 recently contributed by ex-Alderman George W. Allen, a former member of the force while living in London, England, will be used as a nucleus of the fund, and generous contributions are hoped for from citizens in all parts of the Dominion and in the Old Country.

They two-seater automobiles are the rage in Paris.

5000 FOR A SLOGAN

REGINA, Sask.—The World's Grain Show slogan contest is in full swing. "What is a slogan?" The dictionary tells us that "slogan" is a battle word, the war cry or the gathering cry of one of the old Highland clans. In our day, however, it has come to mean a sort of motto. "Strike while the iron is hot" is my motto, says one. My slogan, says another, is "Small profits and quick returns." Against the management of the World's Grain Exhibition and Conference offers a prize of \$500 cash for the best slogan suggesting: "The slogan submitted shall not be more than ten words in length. There is no entry fee and the contest is open to the public. Not more than three suggestions are to be submitted by any one person. These must be written or typed plainly on one side of the paper containing the contestant's name and address, and must reach the office on or before January 31, 1941. Address, Slogan Contest, World's Grain Exhibition and Conference, Imperial Bank Chambers, Regina, Saskatchewan. This great gathering of 1941 is quite generally recognized to be in the interest of all the people of Canada, and here is afforded a real opportunity for all to assist in making it measure up to all that is expected of it.

Bilekmyer (on new job) "Guess I can't work here. There's no place to park my car."

Boss: "No, you won't do. We only hire bricklayers who have their own choppers."

Mother: "Well, Jimmy, do you think your teacher likes you?"
Jimmy: "I think so, mummy, because she marks a big kiss on all my 'rithmetic'."

Along the Mexican border soldiers were searching vehicles which passed close to crossings into Mexico. One evening a car full of young people was stopped and the usual procedure of examining the bottom of the car was in progress, when one young lady asked: "What are you looking for?"
"Arms," replied the sergeant.
"Why," remarked the flapper, "it's all legs down there."

Here and There

(621)
After a trip through western Canada last week, a fellow-director studied at close range business and agricultural conditions in the four western provinces. E. W. Hearty, chairman and president of the Canadian Pacific Railway, recently announced a programme of improvements and extensions to be undertaken forthwith by his railway. Hearty said that he held no conception and no vision of the future of the west in 1932 and that he had not yet seen the west in 1939. Hearty said that he held no conception and no vision of the future of the west in 1932 and that he had not yet seen the west in 1939.

Speaking at Winnipeg after a tour of western Canada, with E. W. Hearty, chairman and president of the Canadian Pacific Railway, General Sir Arthur Currie said he was very much impressed by the progress of the west. Hearty said that he held no conception and no vision of the future of the west in 1932 and that he had not yet seen the west in 1939.

Occupying the entire top floor of the Royal York Hotel, Toronto, Canada's most up-to-date radio studio was operated for the first time October 2 with the broadcast of the Canadian Pacific Railway's "hour of cheerful good music." It will operate a nationwide radio broadcasting through the winter months.

How high can a fish climb? This is a question over which lovers of angling have often argued and debated. Many experts declare that 50 feet is the maximum for a fish to climb by means of a natural device. The Canadian Government Department of Fisheries in an official statement declares that fish in the Mersey River for climbing a fishway 50 feet high and "are making the climb up the river without difficulty."
